**Subject:** Bremerton Gas Works Superfund Site - Upcoming Meeting

Hi Everybody-

I just wanted to follow-up the invitation that was sent out on Tuesday for a meeting to discuss the draft Remedial Investigation/Feasibility Study (RI/FS) Work Plan for the Bremerton Gas Works site. The meeting will be held next Tuesday (June 2) from 1:00-3:00 pm in the Cascade Natural Gas offices in Bremerton. There will be a dial-in option available for those who are not able to attend in person. The details about the meeting can be found in the invitation sent to you Tuesday afternoon by Jeremy Porter of Aspect Consulting. Please note that there are attachments (directions to meeting location) included in the invitation.

The primary purpose of the meeting is to offer you all the opportunity to ask questions about the work being proposed in the draft Work Plan to help you formulate any comments you may have on the Work Plan. The meeting will start with a brief status update and a general overview of the proposed investigation work, and will then be followed by a question and answer session. We've set aside the bulk of the meeting time for your questions, so please bring them with you!

I'm hoping you will be able to attend, either in person or by phone.

Regardless of whether you are able to attend the meeting or not, EPA would like to receive any comments you have on the draft Work Plan no later than Friday June 26. Receipt of your comments by that date, or sooner, will allow us move forward with finalizing the Work Plan before the summer ends and begin field investigation work in the fall. Please send your written comments to me, either by email or snail mail.

As always, thanks for your continued interest and help with this project. Don't hesitate to contact me with any questions.
